

**In the Claims:**

1.-26. Cancelled

27. (currently amended) A garment suitable for one of athletes and motorcyclists, the garment comprising :

a jacket comprising a plurality of airbags to ensure an active protection of the upper part of a body of one of athletes and motorcyclists against one of trauma and fracture due to one of falls and impact against an obstacle, said airbags being associated to an inflating device activated by electronic means in response to the detection of one of risk and danger signals emitted by sensors;

wherein the jacket further comprises a front opening offset from a centerline of the ~~garment~~jacket;

wherein a first of said airbags extends from one side to the other of a chest above the sternum;

and wherein said inflating device is also comprised in the jacket.

28. (previously presented) The garment of claim 27, wherein the inflating device comprises pyrotechnics.

29. (currently amended) The garment of claim ~~28~~27, wherein said sensors are ~~one of~~ incorporated ~~and not incorporated~~ in the jacket.

30. (currently amended) The garment of claim 27, wherein a second airbag of the plurality of airbags is arranged on a back portion of the jacket.

31. (previously presented) The garment of claim 30, wherein said first and second airbag are covered by flaps, the flaps being releasably joined to a remaining portion of the garment.

32. (previously presented) The garment of claim 27 further comprising a support means for housing the inflating device, said support means being joined to an inside of the jacket.

33. (previously presented) The garment of claim 32, wherein the support means comprises a belt.

34. (previously presented) The garment of claim 32, wherein the support means comprises a band for winding around the chest.

35. (previously presented) The garment of claim 32, wherein the support means comprises a strap.

36. (previously presented) The garment of claim 32, wherein the support means also houses said electronic means.

37. (previously presented) The garment of claim 27 further comprising a bottom portion for covering a bottom part of a body.

38. (new) The garment of claim 27, wherein the front opening is not straight.

39. (new) The garment of claim 27, wherein the front opening is offset towards a sleeve.

40. (new) The garment of claim 39, wherein the front opening comprises a curved line.

41. (new) The garment of claim 27, wherein the front opening comprises a closure.

42. (new) The garment of claim 41, wherein the closure comprises a zippered closure.

43. (new) A garment suitable for one of athletes and motorcyclists, the garment comprising:  
a jacket comprising a first airbag to ensure an active protection of the upper part of a body of one of athletes and motorcyclists against one of trauma and fracture due to one of falls and impact against an obstacle, the first airbag extending from a one side to another side of the

chest above the sternum;

an inflating device associated with the first airbag, the inflating device activated by electronic means in response to the detection of one of risk and danger signals emitted by a sensor,

a front opening offset from a centerline of the garment;

a zip fastener disposed in the front opening for opening and closing the opening;

an inflating device comprised in the jacket;

wherein the sensor is incorporated in the jacket.

44. (new) The garment of claim 43, wherein the inflating device comprises pyrotechnics.

45. (new) The garment of claim 43, wherein a second airbag is arranged on a back portion of the jacket, the second airbag associated with the inflating device.

46. (new) The garment of claim 45, wherein said first and second airbag are covered by flaps, the flaps being releasably joined to a remaining portion of the garment.

47 (new) The garment of claim 43 further comprising a support means for housing the inflating device, said support means being joined to an inside of the jacket.

48. (new) The garment of claim 47, wherein the support means comprises a belt.

49. (new) The garment of claim 47, wherein the support means comprises a band for winding around the chest.

50. (new) The garment of claim 47, wherein the support means comprises a strap.

51. (new) The garment of claim 47, wherein the support means also houses said electronic means.

52. (new) The garment of claim 43 further comprising a bottom portion for covering a bottom part of a body.

53. (new) A garment, the jacket portion suitable for one of athletes and motorcyclists, the garment comprising:

a jacket, the jacket comprising

a first airbag for active protection of an upper part of a body of one of athletes and motorcyclists against one of trauma and fracture due to one of falls and impact against an obstacle, the first airbag extending from a one side to another side of the chest above the sternum,

a front opening offset from a centerline of the jacket; and

a first inflating device associated with the first airbag, the first inflating device activated by electronic means in response to the detection of one of risk and danger signals emitted by a sensor, the inflating device comprised in the jacket.

54. (new) The jacket portion of a garment, wherein a second airbag is arranged on a back portion of the jacket, the second airbag associated with second inflating device, the second inflating device activated by electronic means in response to the detection of one of risk and danger signals emitted by the sensor, the second inflating device comprised in the jacket.
